

DIVYA SREE MURTHY

+91 9121655684 | Bengaluru, Karnataka | divyasree202003@gmail.com | Portfolio | LinkedIn | GitHub

Professional Summary

AI/ML Engineer specializing in Generative AI, RAG pipelines, and Computer Vision, with hands-on experience building scalable automation systems and deploying deep learning models in production environments.

Education

Sri Venkateswara College of Engineering (JNTUA) — B.Tech, CSE (AI & ML) 2021 – 2025 | 80%
Sri Chaitanya Junior College — Intermediate (MPC) 2019 – 2021 | 94.5%

Technical Skills

Languages:	Python
ML & Deep Learning:	PyTorch, TensorFlow, Scikit-learn, CNNs, Model Fine-tuning, Feature Engineering, Model Evaluation & Optimization
LLMs & Generative AI:	RAG Pipelines, LangChain, LangGraph, Prompt Engineering, Agentic AI, FAISS, Embeddings, Hugging Face Transformers, Mistral, Stable Diffusion
Computer Vision & NLP:	OpenCV, Object Detection, Image Segmentation (SAM), Video Processing, Emotion Recognition, Speech-to-Text
MLOps & Deployment:	FastAPI, Docker, REST APIs, CI/CD (GitHub Actions), Git
Data & Cloud:	Pandas, NumPy, MySQL, AWS, Hugging Face Hub, GitHub

Experience

AI/ML Engineer — Reintenspark Technology Private Limited Dec 2025 – Jun 2026
Bengaluru (Onsite)

- Led development of AI-driven automation systems, reducing manual company workload by 80%.
- Built CNN-based emotion detection model with speech-to-text pipeline for automated interview analysis, reducing recruiter screening effort by 40%.
- Mentored 3+ interns on AI, RAG, ML, and DL.

AI Engineer Intern — NKB Playtech Private Limited Oct 2025 – Dec 2025
Bengaluru (Onsite)

- Developed AI models using PyTorch and OpenCV for video-based applications.
- Performed data preprocessing, feature extraction, and model evaluation to improve performance.

AI/ML Engineer Intern — EXCELR (AICTE Approved) Dec 2024 – May 2025
Remote

- Built Heart Disease Prediction System trained on clinical datasets of patients, achieving high prediction accuracy.
- Created visualization dashboards reducing analysis time by 30%.

Projects

Interview Intelligence Platform Client Project

- Built multimodal AI system (CV + NLP) for interview evaluation, generating transcripts, emotion labels, and behavioral insights.
- Designed a trust-scoring system that improved recruiter decision speed by 40%.

VectorIQ RAG Personal Project

- Built a RAG-based intelligent search system using FAISS embeddings and Mistral-7B.
- Processed 12K+ text segments for fast semantic similarity search.

AI Casino — Video Augmentation & Generative AI Pipeline Production Project

- Built object detection & segmentation pipeline using SAM (Segment Anything Model) for video frame analysis.
- Developed component swapping and generative pipeline using Stable Diffusion for dynamic background and table.
- Generated 3–5x synthetic video variations from a single input.

Certifications

AWS Generative AI (AWS Skill Builder) • Data Science (Internshala) • Python Technology Stack (Infosys Springboard)
• Mathematics for Machine Learning (NPTEL)
